ZIMENG MING (BRANDON)

Senior Business Systems Analyst ⋄ OpenText ECM ⋄ Guidewire PolicyCenter / ClaimCenter
+1 (780) 952-2116 ⋄ Vancouver, BC
Brandonming0916@gmail.com ⋄ LinkedIn ⋄ My Website ⋄ Github

PROFESSIONAL SUMMARY

Business Systems Analyst / Software Developer with nearly five years at ICBC spanning Guidewire PolicyCenter, ClaimCenter and OpenText enterprise content management. Since March 2026, technical subject matter expert on the Records Management Solutions team: own the OTCS document add/retrieve API services, lead the OTWS service and OpenText version upgrades, resolve IM tickets across OpenText and Guidewire platforms, and support the PCCM and CCCM projects. Combine hands-on platform depth with requirements analysis, process mapping, impact analysis and Agile delivery, plus 3+ years leading cross-functional teams of 5–8 as a project lead and co-founder.

SKILLS

Business Analysis:	Requirements elicitation & documentation (functional / non-functional), stakeholder engagement, process mapping (Visio, swimlane, BPMN), impact & gap analysis, solution evaluation, UAT & test facilitation, root cause analysis, user documentation
Delivery & Operations:	Agile / Scrum (sprint planning, stand-ups, retrospectives), project & team management, full SDLC, build & release management, migration planning, incident / problem / change management, production support, mentoring
Enterprise Platforms:	OpenText Content Server (OTCS), OpenText Web Services (OTWS), Guidewire PolicyCenter & ClaimCenter (Gosu, Guidewire Studio), OutSystems, REST / SOAP API services, ICBC ECM integration services
Analysis & Tools:	SQL (Oracle), JIRA, Splunk, HP Service Manager (HPSM), Git, Visio, Microsoft 365, Linux, Docker, Kubernetes, Terraform, GitHub Actions / Cloud Build CI/CD
Languages & Cloud:	Java, Spring, Python, SQL, JavaScript / TypeScript, Shell, Dart / Flutter, R; Google Cloud Platform (Cloud Run, Functions, Pub/Sub, Firestore), Firebase, MongoDB

EXPERIENCE

Software Developer – Intermediate, Records Management Solutions Mar 2026 – Present
Insurance Corporation of British Columbia (ICBC) *North Vancouver, BC*

- **Technical SME for ICBC's OpenText Content Server (OTCS) records repository:** design, develop and maintain the REST API services that lines of business use to add and retrieve documents, supporting high-volume document ingestion and retrieval from ICBC insurance applications.
- **Lead the OpenText Web Services (OTWS) service upgrade and OpenText platform version upgrade:** gather requirements from Records Managers and ISD teams, perform impact analysis on integrated applications, document the upgrade / migration approach, and coordinate development, testing and release activities with cross-functional teams.
- **Support the PCCM and CCCM projects** (PolicyCenter and ClaimCenter content management integrations with OpenText): translate business needs into functional and technical specifications, map document workflows, and facilitate development and testing to ensure solutions meet business requirements.
- **Lead IM ticket resolution for ECM services:** triage and resolve incidents in HP Service Manager and JIRA, perform root cause analysis on issues spanning OpenText, Guidewire and the integration layer, and implement remediation through the change management process.
- Author API specifications, process flows, runbooks and knowledge-base articles; translate technical concepts for non-technical Records Management stakeholders and identify process improvements that shorten delivery time and raise deliverable quality.

Software Developer – Intermediate, IS Insurance Feb 2024 – Mar 2026
Insurance Corporation of British Columbia (ICBC) *North Vancouver, BC*

- Analyzed and resolved technical defects in Guidewire PolicyCenter (Gosu, Guidewire Studio) tracked in JIRA; worked with business teams to clarify requirements, assess impact and deliver fixes on schedule.
- Core member of the Incident Management team: handled priority-ranked incidents in HP Service Manager — analyzed production Oracle data with SQL, wrote Gosu data-change scripts, validated API endpoints, performed root cause analysis, and contributed to problem and change management.
- Co-designed and built a Vehicle VIN / VIC update application in OutSystems within an Agile team; gathered requirements from business users, mapped the existing manual process, and automated ~90% of manual steps, significantly reducing update errors.
- Led knowledge-transfer sessions and mentored intern developers; partnered with senior developers on code analysis and adoption of best practices.

Software Developer, IS Insurance Nov 2021 – Feb 2024
Insurance Corporation of British Columbia (ICBC) *North Vancouver, BC*

- Developed and supported enhancements and defect fixes in Guidewire ClaimCenter and PolicyCenter, working across the full SDLC from requirement clarification and estimation through build, testing and release.
- Collaborated with business analysts, QA and business stakeholders to refine user stories and acceptance criteria, support UAT, and document technical changes in JIRA.
- Participated in Agile ceremonies (sprint planning, stand-ups, retrospectives) and release activities across multiple concurrent initiatives with changing priorities.

Software Engineer Lead, Co-Founder Jan 2021 – Aug 2023
Culina Technology Ltd *Vancouver, BC*

- Led and mentored a 5-person team of UBC and UVic students: owned the product backlog, sprint planning, stand-ups and reviews, and delivered a cloud-native, event-driven platform on GCP (Cloud Run / Functions, Pub/Sub, Firestore) with a Flutter front end, TypeScript back end and Stripe payments.
- Owned requirements end to end — translated customer and partner needs into user stories, acceptance criteria and workflow diagrams, and prioritized scope against timelines and team capacity.
- Built CI/CD with GitHub Actions + Cloud Build (containerized services, automated tests, blue/green and canary releases) and designed event-driven order, notification and Stripe-webhook workflows with idempotency and DLQ-backed retries.

Research Technician Co-op (Data Specialist) Jan 2020 – Dec 2020
BC Ministry of Forests, Lands, Natural Resource Operations and Rural Development *Nelson & Victoria, BC*

- Gathered data-collection and analysis requirements from the West Arm Demonstration Forest (WADF) research team and delivered Python / R / SQL solutions for climate datasets, including QA/QC algorithms to clean and gap-fill unreliable data.
- Authored and presented user manuals for the QA/QC tools and provided ongoing technical support to researchers.

Data Science Co-op, Anti-Telecommunications Fraud Team May 2019 – Sept 2019
China Construction Bank Fintech Ltd *China*

- Gathered requirements from multiple business departments and authored the user operation manual for the fraud alert system; provided ongoing technical support to system users.
- Analyzed and classified fraud cases from daily banking transactions using Spark SQL and Python, and presented findings through a knowledge graph built with React and Ant Design.

PROJECTS & LEADERSHIP

OneNata App & SaaS — Project Lead

- Led an 8-person cross-functional team (developers, designers, QA) to deliver OneNata, a dual-product ecosystem (B2B SaaS for pet businesses + consumer app); owned roadmap, scope, sprint planning, stakeholder communication and release decisions.
- Architected cloud automation on GCP: zero-downtime CI/CD (GitHub Actions + Cloud Build), infrastructure as code with Terraform, event-driven microservices (Pub/Sub, Cloud Functions) with Gemini API integration, and observability with auto-remediation.

SPC Pay — Project Lead

- Managed an 8-person team of developers, designers and QA engineers to deliver a mobile financial app (Flutter, Firebase, Cloudflare Workers on GCP) from UI/UX design through production release.
- Ran Agile delivery end to end — sprint planning, daily stand-ups, retrospectives and risk / blocker management — and maintained clear communication across departments to keep delivery on track.

EDUCATION

Bachelor of Science in Combined Computer Science and Statistics, Co-op Jan 2016 – May 2021
University of Victoria, GPA 7.0 / 9.0 *Victoria, BC*

Relevant courses: Machine Learning, Systems for Massive Datasets, Intro to AI, Algorithms and Data Structures
